Installing Post Mounts on Pressure-treated Wood Framing

Corner Post Installation

1. Install 2” x 8” (5.1 cm x 20.3 cm) cross bracing frame in between joists at 7-1/4” (18.4 cm). Attach a total of twelve 3” (7.6 cm) pressure-treated compatible screws (not provided).

2. Install two 2” x 8” (5.1 cm x 20.3 cm) boards as blocking under post location. Securely attach blocking using a total of twenty-four 3” (7.6 cm) pressure-treated compatible screws (not provided).

NOTE: TO ENSURE THE BLOCKING IS FULLY SECURE, USE THE AMOUNT OF SCREWS INDICATED ABOVE.

TIP: USE TWO ADDITIONAL SCREWS TO “SANDWICH” BLOCKING BOARDS TOGETHER FOR EASIER ATTACHMENT TO FRAMING.

Line Post Installation

3. Install two 2” x 8” (5.1 cm x 20.3 cm) cross bracing frames in between joists at 7-1/4” (18.4 cm). Attach a total of twelve 3” (7.6 cm) pressure-treated compatible screws (not provided).
4. Install two 2” x 8” (5.1 cm x 20.3 cm) boards as blocking under post location. Securely attach blocking using a total of twenty-four 3” (7.6 cm) pressure-treated compatible screws (not provided).

5. Using post a template, mark locations of holes.
6. Drill through decking and blocking boards using 5/8” diameter bit (long drill bit will be required).

7. Insert the (2) stainless steel barrier strips under the mounting bolt holes. BARRIER STRIPS ARE REQUIRED ONLY IF ATTACHING POST DIRECTLY TO PRESSURE-TREATED FRAMING.

8. Attach posts using four 3/8” x 6” (1 cm x 15.2 cm) hex cap bolts, washers, and nuts, along with aluminum back plate on underside of blocking. If the project requires IRC compliance, this back plate MUST be installed under the decking to ensure this will meet code compliance. Reference SKU part number ALPOSTHWDECK for required hardware and aluminum plate. (Consult local code official for more information on IRC Compliance.)

9. Place or rest bottom aluminum guide block on bottom of post. Place guide on post so that notch is on a side that does not require railing to be attached.

10. Attach bottom guide block using one 10 x 1” self-tapping screw (provided) in notch to lock guide block onto post.

11. Location of top guide block will vary slightly depending on type and height of railing being installed. Determine this measurement and place top guide block in location where top bracket for desired railing would be approximately on center of the top railing bracket location.

12. Attach top guide block using one 10 x 1” self-tapping screw (provided) in notch to lock guide block onto post.

NOTES:
» Use composite shims or similar material (not provided) if posts are not plumb. Ensure that post is placed on decking surface so that it clears the rim joist and there is enough clearance on the underside blocking for the back plate to be installed.
» Rim joist removed to show proper attachment of hardware.

Install Guide Blocks

NOTE: Pre-drilling is not required but is optional for attachment of guide blocks to post. Use a drill bit slightly smaller in size than that of screw being installed.

Install Railing System of Choice

NOTES:
- A quantity of 18 #8-15 x 1-1/4” screws are provided to cover all types of Trex railing bracket installations (Transcend, Trex Signature®, and Select). Depending on the type railing being installed, you may have screws that are not used.
- If using 6x6 post sleeves, attach designated railing brackets using #8-15 x 1-3/4” (4.4 cm) 316 stainless steel self-tapping screws (not provided).

» Pre-drilling IS REQUIRED when attaching brackets to designated posts. Use a 9/64” (3.6 mm) drill bit to pre-drill at specified locations according to instructions provided with railing kits.

NOTE: If installing Trex Deck Lighting on the posts, drill hole through support blocks to allow wiring for lights to be below the surface of the decking.
