TREX® Transcend Decking

Maximum Joist Spacing

16"

TREX™ Transcend Decking

TREX™ shall span a minimum of three (3) joists and fastened at each joist.

Notes:
- Maximum joist spacing listed for decks with a maximum specified live load of 100 PSF.
- Specified loads of greater than 100 PSF need to be reviewed by designer.
- Not to be used in areas where the temperature exceeds 54.4 degrees Celsius.
- Maximum spans listed above limited to a L/360 total load deflection.
- Support structure including joist sizes assumed designed by others.
- Install decking with gaps to ensure proper drainage. Do not install Trex™ Transcend decking directly to concrete, patios or membranes where water can be trapped beneath the decking material.
- Fasten Trex™ Transcend decking to support joist with appropriate corrosion resistant deck fastener (screws/nails/mechanical connection).
- Typ. Trex™ Transcend decking board 1" thick x 5.5" wide.
- Longitudinal slip resistance is > 0.5 as per ASTM F1679-04 test.
